Summary

Extensive knowledge with multiple programming languages such as .Net, Java, Docker, Python, Node JS, and more. As well as a in depth understanding of cloud based infrastructure that I've used to create the process to develop, deploy, and release products to clients globally.

Work History

06-2021-present

DevOps / Release Engineer

AdvancedMD, South Jordan - In Person

- Wrote code with Powershell & .NET Frameworks to improve efficiency within our projects and save the company thousands of dollars daily.
- Utilized Cloud Bees & Azure DevOps to effectively roll out product releases for several clients by creating pipelines and managing releases.
- Integrated with leadership in order to effectively communicate and produce quality tools with and for foreign and domestic departments.
- Utilized AWS services in order to create a horizontal and vertically scaling environment, where the company could be more cost efficient with their resources saving them time and money.

04-2021-06/2021

Quality Assurance Engineer

AdvancedMD, South Jordan - Remote

- Used Postman to test funtions of the application and reduce bugs.
- Created Unit Tests to help automate and reduce bugs while verifying the integrity of our application.
- Wrote code in the C# .NET Core Framework to implement the Unit Testing.
- Utilized a form of Agile Scrum to effectively communicate and plan with other members of the company.
- Worked with AWS Workspace, and servers to help setup, and automate the creation of other environments.

02-2022-present

Co-Founder | DevOps & Full Stack Development

Caneye LLC, Salt Lake City - Remote

- Overseeing and leading the development of the startup companies product, ensuring it is cost effective and scalable.
- Organized and maintained strict company security and compliance standards in order to ship a complete solution to our clients.
- From the ground up developed both the front and back end systems for the product and internal systems within Caneye.

Personal Projects

10-2018-present

Graphics Designer

daylanhoff.com, Utah, - Salt Lake City

Designed and created unique logos, banners, and even animations for several people allowing them to create their brand Online.

09-2023-present

Full Stack Developer

GameBubbles, Utah, - Salt Lake City

Using NodeJS, NextJS, etc. I created a private web interface that scans Steam, GOG, and other 3rd party resellers for the best deals on games and items.

03-2019-06-2020

Full Stack Developer

DAHTOOLS, Utah, - Salt Lake City

Created a simple multi-tool with high levels of encryption to serve as a self hosted password management tool, and screenshot tool.
